

* create a BST using following values.

100, 96, 110, 98, 95, 120, 109, 113, 130, 83

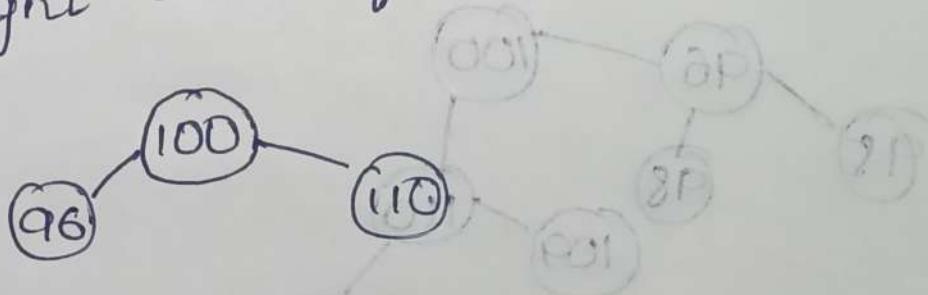

The first value is 100. Hence it becomes a parent node.

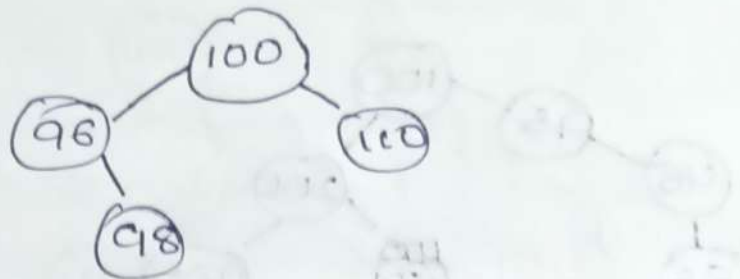

Insert 96: $96 < 100$. Hence 96 is inserted at left of 100.

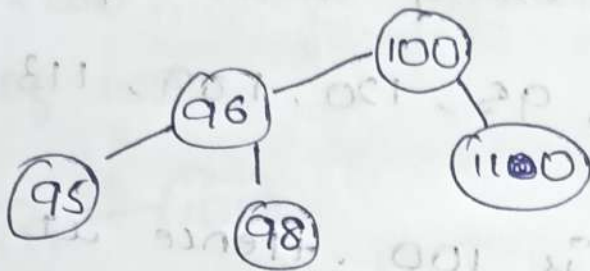

Insert 110: $110 > 100$. Hence insert 110 in right side of 100.

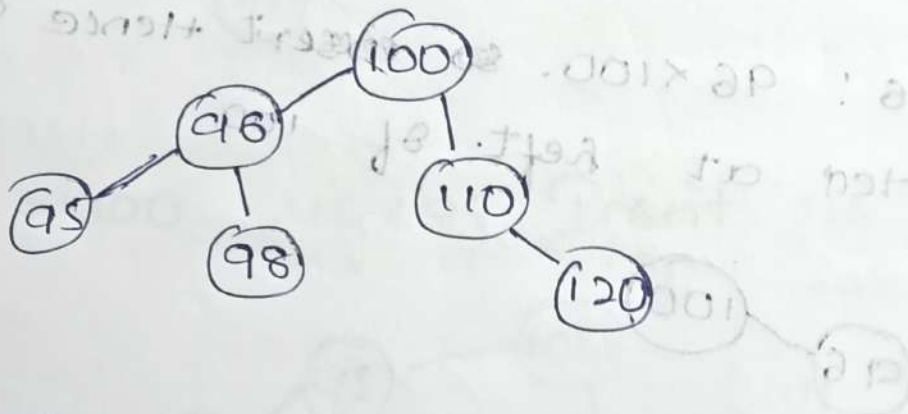

Insert 98: $98 < 100$, $98 > 96$ insert 98 right side of 96

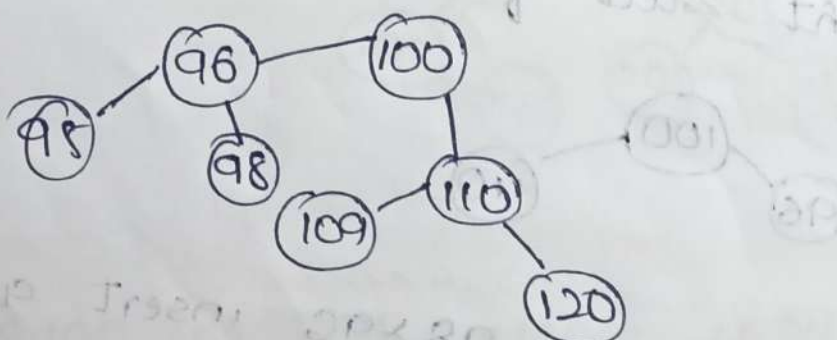

5) $95 < 100$, $95 < 96$. Insert 95 ^{left} ~~right~~ side of 96.

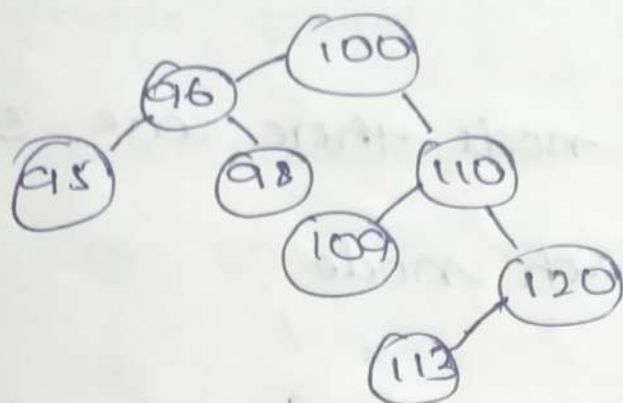

6) $120 > 100$, $120 > 110$. Insert 120 right side of 110.

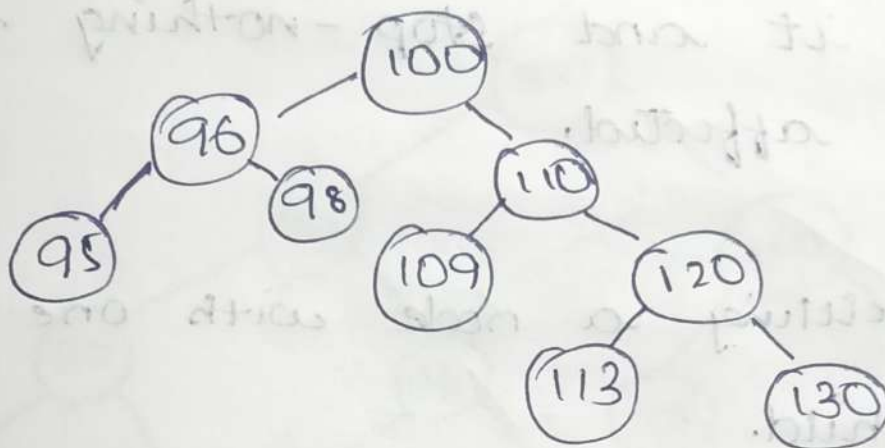

7) $109 > 100$, $109 < 110$. Insert 109 left of 110

9) 130 :-

10) 83 :-
