

Q. Find out the application of recursion
Is recursion still used in the present
programming era. Why?
What are the languages that support
recursive call.

Ans:- Recursion is used in:

Calculating Factorial of a number

Fibonacci Series.

Tree & graph traversal

Searching & sorting algorithms.

Yes, recursion is still used. because

1) Make code easier, shorter for complex
number.

2) Many algorithms depend on recursion.

languages support recursion

1) C

2) C++

3) python

4) Java

5) C#

6) PHP

7) Ruby

8) Swift

9) Kotlin
